SUMMARY

Full-Stack Software Engineer with 4+ years building web applications across Education , Blockchain . Expertise in Next.js, Angular, Spring Boot, AI/ML integrations. Co-founder with startup experience.

EXPERIENCE

SOLVIZOR | FULL-STACK SOFTWARE ENGINEER

Jan 2025 – Sept 2025 | Remote

- Led the frontend development of the app designing responsive UI sections such as chat , chat component UIs and landing page using chadcn ui and tailwindcss
- Developed an AI-powered chat interface with an orchestrator using OpenRouter for automatic model fallbacks, integrating 20+ wallet analysis tools to enable natural language queries for portfolio analysis, PnL tracking, and token discovery
- Implemented a background job processing system using Redis queues and Node.js workers that handle signature fetching in batches , transaction parsing, and price updates, processing blockchain historical data asynchronously
- Designed a data processing pipeline that transforms raw blockchain transactions into structured data, calculates profit/loss metrics across token swaps, and maintains transaction history

LEARNA | FULL-STACK SOFTWARE ENGINEER

May 2024 – Dec 2024 | Tunisia

- Led the frontend development of the app creating responsive UIs such as Learn , explore and Quiz creator with Tailwind CSS , daisyUI and TanStack Query for optimized data fetching and caching
- Built AI-powered learning SaaS generating educational summaries and quizzes from PDFs, articles, and YouTube.
- Added the social aspect to share quizzes and learning mode to learn without being graded

AMI | SOFTWARE ENGINEER

Aug 2021 – Mar 2024 | Tunisia

- Created interactive and Responsive UI components using Angular Material, PrimeNG, and custom CSS and animations.
- Implemented backend REST APIs using Springboot and MVC architecture.
- Built adaptive learning algorithms to generate competency-based learning paths
- Implemented advanced search with Spring Search specification patterns

AMI | SOFTWARE ENGINEERING INTERN

Feb 2021 – Jul 2021 | Tunisia

- Developed Angular components for authentication and navigation with reactive forms and RxJS
- Created Use case , Entity-Relationship and Sequence diagrams according to the needs of the client
- Set up Spring Boot backend with Maven, MySQL, and REST endpoints controllers , and repositories using Spring Data JPA

EDUCATION

ESPRIT

SOFTWARE ENGINEERING

Sept 2019 – January 2021 | Tunis, Tunisia

Software Engineering

IPSAS

SOFTWARE ENGINEERING

Sept 2018 – June 2019 | Sfax, Tunisia
Computer Science Fundamentals

ENIS

CILVIL ENGINEERING

Sept 2013 – June 2016 | Sfax, Tunisia
Specialised in Buildings

IPEIS

MATHS AND PHYSICS

Sept 2011 – June 2013 | Sfax, Tunisia
Rank 945

SKILLS

LANGUAGES

JavaScript/TypeScript

Java • SQL

FRAMEWORKS

Next.js • Angular • Spring Boot • React

DATABASES

MongoDB • PostgreSQL

MySQL • Redis

DEVOPS

Docker • Kubernetes

AWS • Vercel

GitHub Actions

TOOLS

Git • REST APIs • tRPC

WebSockets • OAuth2/JWT

Stripe • AI/LLM APIs

PROJECTS
